

MOVEit Automation Implementation Services

Purchasing our products is just the start of our relationship. Once you've purchased one of our products, our team of Progress Professional Services Technical Consultants can work with you to ensure a timely, efficient and successful deployment of our software.

The MOVEit Automation Implementation Service is designed to provide the flexibility needed for a tailored implementation and configuration. One of our Technical Consultants will undertake the core implementation activities as well as provide up to 3 hours of installation and post-implementation support.

Core Implementation Service

Implementation Services allow your system administrators or support personnel to work with our Technical Consultants to accomplish the following:

Project Planning

- Discuss implementation strategy
- Verify prerequisites
- Schedule activities

Implementation

- Install the MOVEit Automation software
- Discuss backup procedures

Post-Implementation Service

Once the core Implementation Service activities are complete, customers will be able to select items from the list below to exhaust the remaining time:

Post-Implementation Service Activities – up to 3 hours

- Disaster Recovery Install/Setup
- Product Consulting
- AS2 Configuration
- Workflow Setup
- Configure Service to run as a Domain User
- Define Database/Log retention settings
- External Admin/User Access
- Task Groups and Permissions
- Global Parameters
- Host & Template Task creation
- Import SSH & PGP Keys, SSL Certificates
